

NOAA's National Weather Service Philadelphia/Mt. Holly NJ

Issued: Wednesday, February 10, 2016 – 100 PM

Next Briefing: By 400 PM on Thursday, February 11, 2016

Major cold weather outbreak with coldest temperatures this weekend

Hazards and Impacts:

Cold temperatures and wind chill values: Several rounds of colder air will be moving into the region starting later tonight. After today, temperatures will remain below freezing until early next week. Strong northwesterly winds will accompany the colder air, resulting in some very cold wind chill values.

The coldest temperatures and wind chills will be this weekend. Temperatures will be dropping during the daytime Saturday as another round of Arctic air moves into the region. Low temperatures Saturday night will range from minus 12 up in the Poconos to near 5 above near the Atlantic Coast. Wind chills will be even colder, ranging from minus 30 in the Poconos to minus 10 in the south.

Wind chill temperatures this cold will be dangerous to people and pets. Property damage due to frozen water pipes is also likely when temperatures get this cold.

Cold weather safety concerns

Frozen pipes could be a significant problem.

Dead car batteries could strand people.

Any fuel or power outages that occur could leave people without heat.

People may improperly use secondary sources of heat; increasing chances for Carbon Monoxide (CO) poisoning.

Structure fires could escalate.

Frostbite/hypothermia.
